Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 17 September 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Inventorship

1. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 7-17, 20-21, 23 rejected under 35 U.S.C. 102(b) as being anticipated by Beck et al (6,354,268).

Beck et al teach a method for improving ignition of an internal combustion engine comprising the step of correcting the engine condition by reducing air/fuel supply to the engine.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 5, 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wu et al (6,006,155) in view of Beck et al (6,354,268).

Wu et al teach a method and system for detecting the cylinder misfire is performed using RPM variation analysis. Beck et al teach the step of correcting the engine condition by reducing air/fuel supply to the engine. Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the step of correcting the engine condition by reducing air/fuel supply to the engine as taught by Beck et al in order to improve the ignition system of the engine.

4. Claims 6, 19, 22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Takahashi et al (6,298,823) in view of Beck et al (6,354,268).

Takahashi et al teach a knock control apparatus includes a means for detecting ion current. Beck et al teach a step of correcting the engine condition by reducing air/fuel supply to the engine. Therefore it would have been obvious to one having ordinary skill in the art at the time the invention was made to employ the step of correcting the engine condition by reducing air/fuel supply to the

engine as taught by Beck et al in order to improve the ignition system of the engine.

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hai H. Huynh whose telephone number is (703) 306-9183. The examiner can normally be reached on Monday through Thursday from 7:30 am to 6:00 pm.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
